

# HYBRIDOMA SEQUENCING

★  
**MADE IN USA**

**GUARANTEED  
LOWEST PRICE**

**>99%  
SUCCESS RATE**

**RELIABLE RESULTS  
LOCAL SUPPORT**

**FAST TURNAROUND**

Get results. Move your research forward.

**PROUDLY  
MADE IN  
NEW JERSEY**

**Your Partner in Antibody Success.  
Saving. Speed. Success**

# Case Study

In a recent oncology study, a client needed full antibody characterization without prior isotype information.

**Within just 5 business days, we delivered:**

Verified variable regions (~500 bp)  
and constant regions (~400–600 bp)

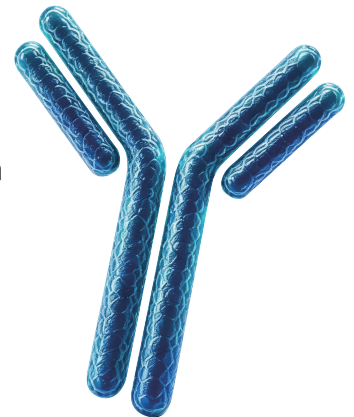

**>95%**  
sequence integrity

**≥4** productive  
sequences per clone

Data ready for recombinant expression  
with **no rework required**

## Applications

This service is suitable for a broad range of research and development applications, including:

- Monoclonal antibody discovery
- Oncology & immunology research
- Antibody engineering & recombinant expression
- Hybridoma validation & characterization
- Legacy hybridoma sequence recovery
